Meaningful Innovation.

WELCOME TO V-TAC

V-TAC Lighting

V-TAC Digital

V-TAC Audio

V-TAC Solar

V-TAC Electrical

V-TAC Smart

V-TAC Energy

V-TAC was founded with the vision of providing energy-efficient LED lighting solutions worldwide.

While building a vast portfolio in LED lighting over the past years, we were also able to build expertise in innovation and expand our R&D team to offer a diversified catalogue with over 3500 products to our clients and partners all over the UK and Europe.

Utilizing our brand value and manufacturing technologies, we have been expanding our product categories beyond lighting, with one mission to improve the lives of humanity worldwide.

Now, we are moving towards promoting sustainable practices that will help citizens and businesses lower their carbon footprint, and become a global leader in providing energy efficient systems — including solar panels, inverters, battery packs, and power stations.

**Many divisions,
one mission.**

2009

V-TAC was founded with the vision of providing energy-efficient LED lighting solutions worldwide

2011

Began our EU expansion by opening the first V-TAC warehouse and office in Sofia, Bulgaria

2013

Started building our distribution network in the UK from our office in Southall, London.

2015

Launched our in-house product testing lab in Sofia, Bulgaria.

2016

Achieved \$100M Annual Turnover- Manufacturing Joint Venture with Samsung DASHER Lighting for decorative lighting.

2017

In-brand partnership with Samsung. Launched the V-TAC Pro series.

2022

Progressed into the green energy era with our new Renewables range

2021

Centralized warehouse in Bulgaria extended to 42000+ sq mts.

2020

- New website launch
- Opened new office in Ireland.

2019

Opened new office in Poland.

2018

- Partnership with Tuya and launched new Smart Series
- Unveiled the new V-TAC Showroom in Slough, UK

Collaboration for Impact.

In-Brand Partnership

Driven by our mission to continuously improve the quality and efficiency of our products, V-TAC developed PRO-Series LED in partnership with Samsung.

V-TAC's flagship product range, the PRO-Series features LEDs from Samsung and 5 Year warranties.

WARRANTY

A woman is shown in profile, looking down at a glowing, white, geometric object she is holding in her hands. The object has a complex, crystalline structure with multiple facets. The scene is set in a dark environment, with the primary light source being the object itself, which casts a warm, orange glow. The woman is wearing a necklace with a pendant. The overall mood is one of focus and discovery.

Meaningful Innovation.

Innovation has been our core from the beginning. But we aren't just innovators. We are problem solvers. We innovate to make positive impact. Not just for our customers, but for the human race.

Driven by our passion to provide the most efficient products and solutions, we are fully committed to building a brighter yet sustainable future.

Free Lighting Design Services

Get your Lighting Scheme, by providing the below requirements.

1

Site or Floor plans. If these are not available then we will need the dimensions of the lighting area (Length X Width X Height).

2

Mounting height of the light fittings (if different to the dimensions provided in step 1).

3

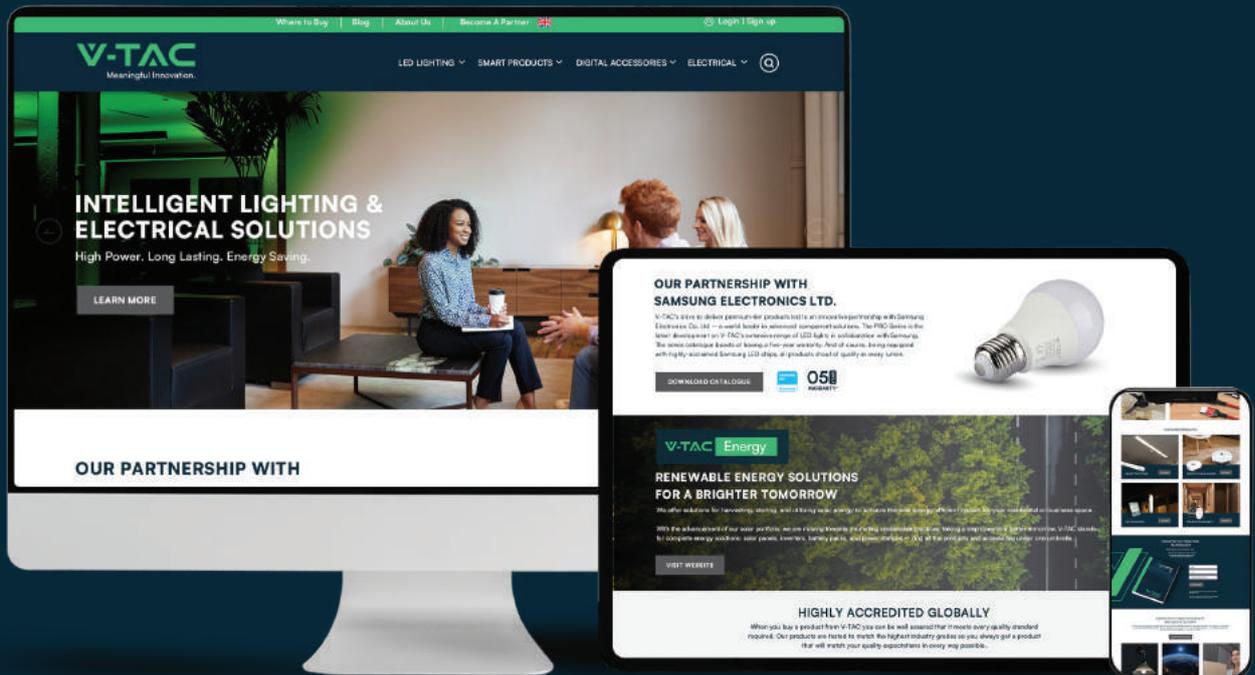

Description of the site's activities (Office, School, Warehouse, etc).

4

Any preferred type of fitting or V-TAC part numbers? Alternatively we can provide recommendations.

We aim to supply you with the lighting design, a list of fittings with the quantity and a quotation within 48 hours. 3D walkthroughs can be arranged upon request

Send us your queries at: projects@vtacexports.com

A Seamless Trade Experience

www.vtacexports.com

V-TAC launched an upgraded B2B e-com platform. The website offers both account users and guests an easier way to check prices, stocks, product specifications, and infographics.

RRPs (Recommended Retail Price) is one of the key offerings of the website where electricians, contractors, and all the other users of the site can view without logging in.

As it is a trade-only website, sign-up rights are exclusively for qualifying wholesalers to place orders and view trade prices once they are logged in. Other resources like manuals, certificates, etc are also available in standard downloadable formats.

Linear Lights

V-TAC LED Linear Lights are an energy-efficient, low-maintenance alternative to traditional linear fluorescent in industrial, commercial, and light assembly applications. It is the optimal solution for conventional lighting systems and excellent for new installations due to its low installation cost.

LED Panels

The PRO Series LED panels range are all made with top-quality PMMA diffusers which provides a uniformly distributed light and prevents the panels from turning yellow. It proves its durability with exteriors composed of an innovative combination of Aluminium+PMMA+PP, and its energy-saving upgrade through the improved driver box and Samsung LEDs. Both mini and big panels are inclusive of a quick connector for easy installation.

LED Highbay & Linear Lowbays

LED highbays and lowbays are types of lighting fixtures commonly used in commercial and industrial settings. LED highbays are typically used in facilities with high ceilings, such as warehouses, distribution centres, gymnasiums, and factories. They are designed to provide bright, high-intensity lighting over a large area, and are typically mounted at a height of 20 feet or higher. LED highbays offer energy savings and longer lifespan compared to traditional highbay lighting options such as metal halide or high-pressure sodium lamps. LED lowbays are designed for use in spaces with lower ceilings, such as garages, storage rooms, and workshops.

Motion Sensor

Many areas, such as driveways, lobbies, parking garages and staircases remain unused for long hours but do need lighting to be lit automatically in case of movement. A motion sensor is a device that detects movements, and in some cases, light conditions and then transmits a signal for illumination.

LED Spotlights

Our new range of LED spotlights with Samsung LEDs are the leading choice for efficient directional lighting solutions. This new range is perfectly compatible with existing GU10 holders. They deliver the same warm light as halogen spots while exhibiting the energy-saving benefits that LEDs provide. Ideal for retail and residential lighting.
